

PPC3 – Environment Variables Fix

Applications Engineering – Low Power Audio & Actuators

Update Environment Variables – 1

- Open **File Explorer**
- Right-click on **This PC** and **Properties**
- Select **Advanced system settings**

Update Environment Variables – 2

- In **Advanced** tab, select **Environment Variables**
- Under **System variables** look for **Path** and double click on it

The image shows two overlapping Windows dialog boxes. The left box is 'System Properties' with the 'Advanced' tab selected. A red arrow points from the 'Advanced' tab to the 'Environment Variables...' button at the bottom. The right box is 'Environment Variables' with the 'System variables' section expanded. A red arrow points from the 'Path' variable in the 'System variables' list to the 'Edit...' button.

System Properties - Advanced Tab
