

How to do a flash dump using CCS 3.3v?

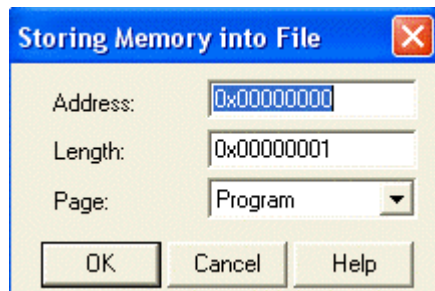

1. Start Code composer studio 3.3v
2. Connect the device and make sure to unlock the device if required.
3. Goto File -> Data -> Save as shown below:

4. Make sure to select Hex (*.dat) in Save as type

5. Enter the start address of flash and the length of flash. Once you enter the correct information, click OK. You should have .dat version of the flash dump.

6. The flash dump can be opened in Wordpad as shown below:
